

Flat Head Self Drilling Screw

Welcome to buy Flat Head Self Drilling Screw from us. Every request from customers is being replied within 24 hours. Linhui as the professional manufacture, we would like to provide you Flat Head Self Drilling Screw. And we will offer you the best after-sale service and timely delivery.

Product Description

Linhui Standard Parts provides high quality Flat Head Self Drilling Screw. Self-drilling screws have a drill bit tip that taps a hole while fastening material together. These screws are typically used to fasten materials to aluminum or sheet metal without the need for a pilot hole. If you're looking for flat head self-drilling screws with high quality, Linhui Standard Parts can warmly accommodate you.

As with all types of self-drilling screws, this Flat Head Self Drilling Screw creates its own threads when driven into the material. This prevents the need to drill an additional pilot hole. Flat screw heads are the most common types..
